

Cloud-based services

advarics.retail

The merchandise management system with numerous basic functions which can be supplemented individually as required with modules such as store management, invoice, NOS, CRM, invoice verification and much more.

advarics.cash

The online and offline cash register, which processes all transactions in real time for merchandise management and connected e-commerce solutions.

advarics.api

The real-time interface for webshops, loyalty programmes, staff planning, mobile apps, cross-channel modules and much more.

advarics.datawarehouse

The individual analysis tool with real-time data.

advarics.edi

Connection to suppliers, clearing centres and retail associations.

advarics.display

The free digital shop window for all users.

Advantages

- applicable to any size of company
- mobile and location independent
- up to 80% less infrastructure required
- all transactions, bookings and analyses available in real time everywhere
- no installation and updates from an app store necessary (except advarics.cash)
- access from browser to devices, file system and sensors
- monthly, needs-based billing, no workstation licensing
- no investment risk, no leasing agreements necessary
- rapid product evolution, continuous updates
- Data transfer from (almost) all competitor systems
- no VPN networks or software licences for remote desktops or terminals necessary
- no fixed IP addresses necessary
- 256 BIT encryption (bank standard) & managed firewall
- advarics Cloud = private cloud
- state of the art cloud server technology
- automatic backups every 30 minutes (incl. geo-redundant backup) included as standard
